Delivering Business Process and Business Intelligence Solutions

"Kyria supported British Energy's development of its cash flow forecasting systems, in terms of business analysis, developing specifications, design and build of models and implementation. This was a critical implementation for the Company and Kyria proved their worth throughout the process. I would have no hesitation in working with them on future projects."

John Jackson
British Energy plc
Group Treasurer

"I would not hesitate using Kyria again on later projects. They have always been keen to ensure that the needs of the business are met and their professional, high quality approach is to be highly commended."

Stephen Doherty
Project Manager
Grid System Operation
ScottishPower EnergyNetworks

"I would have no hesitation in working with them on future projects"

Business Solution Architects

Kyria delivers Business Intelligence and Business Process solutions using Microsoft technologies.

"Their professional, high quality approach is to be highly commended"

Experience

As a Customer, you get access to a team with over 100 years experience in business, engineering and the IT industry. You benefit from skills that deliver senior consultancy services to a range of Customers, as well as technical/project management resources into client projects, including PRINCE2 Practitioner capability.

Technical Excellence

Kyria is a Microsoft Certified Partner so you can be confident in our proven ability to deliver, from enterprise wide workflow and management information systems, to bespoke web applications.

Commitment, Integrity and Quality

Kyria delivers business solutions that drive cost savings, efficiency gains and strategic advantage. Our core values are Commitment, Integrity and Quality and we build long term relationships with our Customers. We work with you to fully understand your business drivers and identify the right solution for your particular needs.
